

## Don't want to read a verbose Whitepaper?

What is CHN in as fewer words as possible?

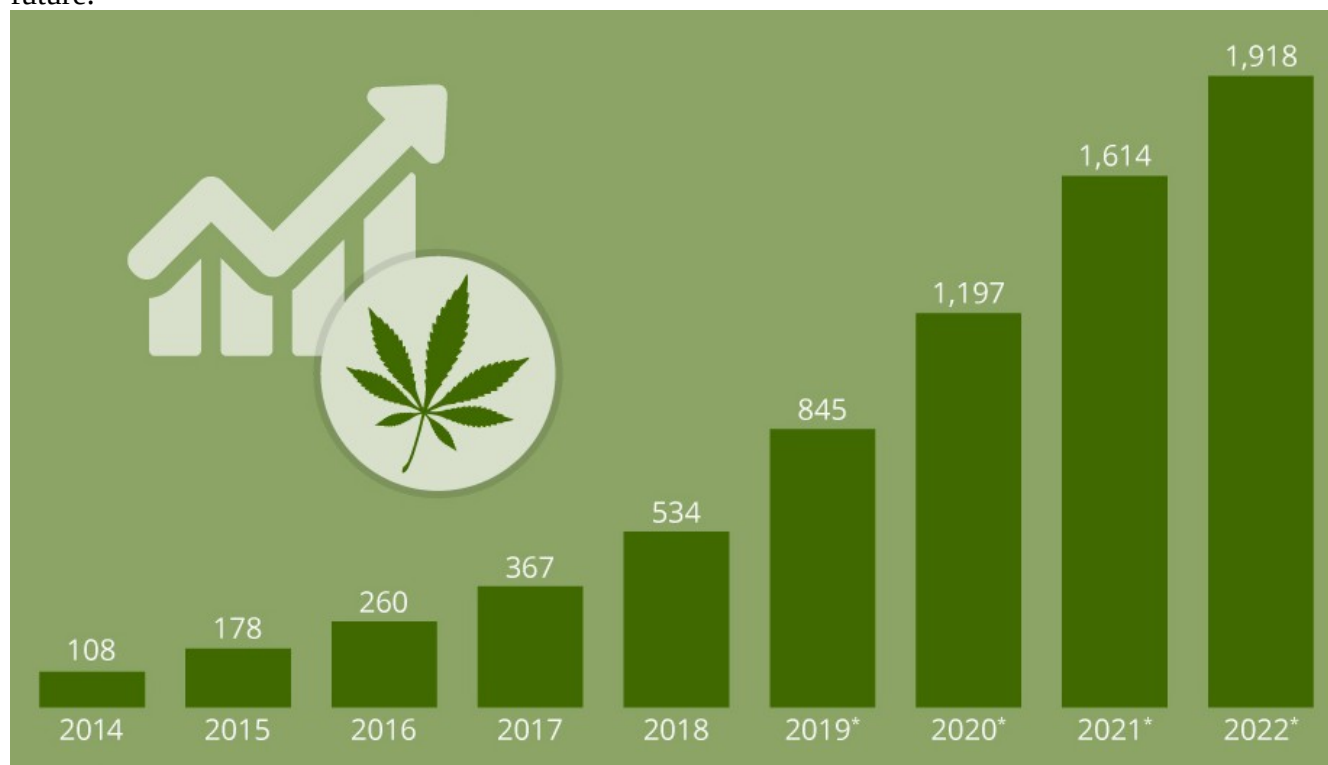

*CHN is a tool for CBD retailer and consumers. Designed around Amazon functionality .Ease of use and familiar consumer experience . Unlike Amazon, CHN platform will be a Decentralized platform. Void of central governance. Void of human errors. Designed by humanity .Immortal by technology.*

The **Hemp Farming** Act of 2018 was a proposed law to remove **hemp** (**defined** as **cannabis** with less than 0.3% THC) from Schedule I controlled substances and making it an ordinary **agricultural** commodity. Its provisions were incorporated in the 2018 United States **farm bill** that became law on December 20, 2018.

## Trends and Insights:

### The Current State of the **CBD Industry**

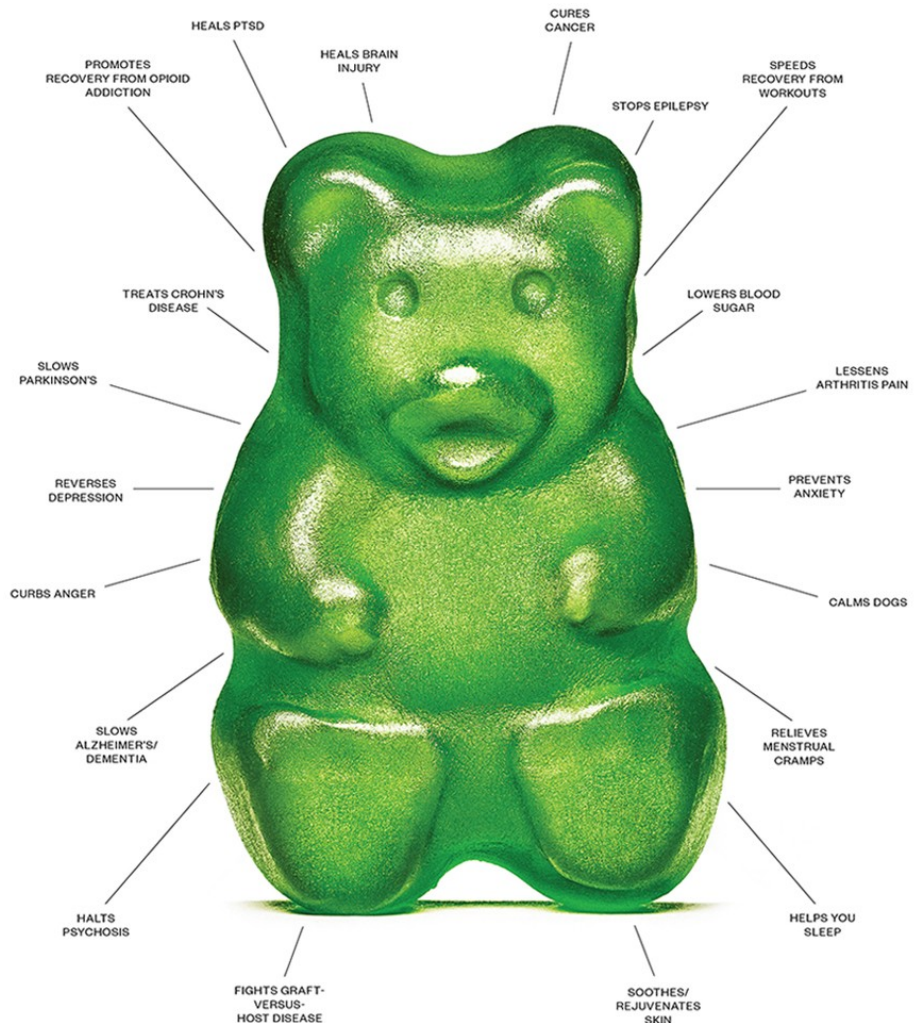

That same data released by Statistic predicted that sales would reach \$1.8 billion by 2022; however, a **2019 CBD market** report by Brightfield predicts that the **industry** will reach \$22 billion in the near future.

*“Millions of people are turning to CBD products as treatment to many health conditions. Some just want the health benefits associated with CBD products.”*

**Cannabidiol (CBD)** is one of the 150+ naturally occurring phytocannabinoids found in certain strains of hemp and in all cannabis plant strains.

It is legal in many places and is used in the management and treatment of chronic pain, PTSD, anxiety, anxiety disorder, depression, diabetes type 1, diabetes type 2, seizures, and in conjunction with allopathic approaches to diseases including cancer chemotherapy and radiation therapy. Anecdotally CBD is being used with claimed positive results by patients for almost every illness.

## History

Cannabis Indica extract bottle circa 1906

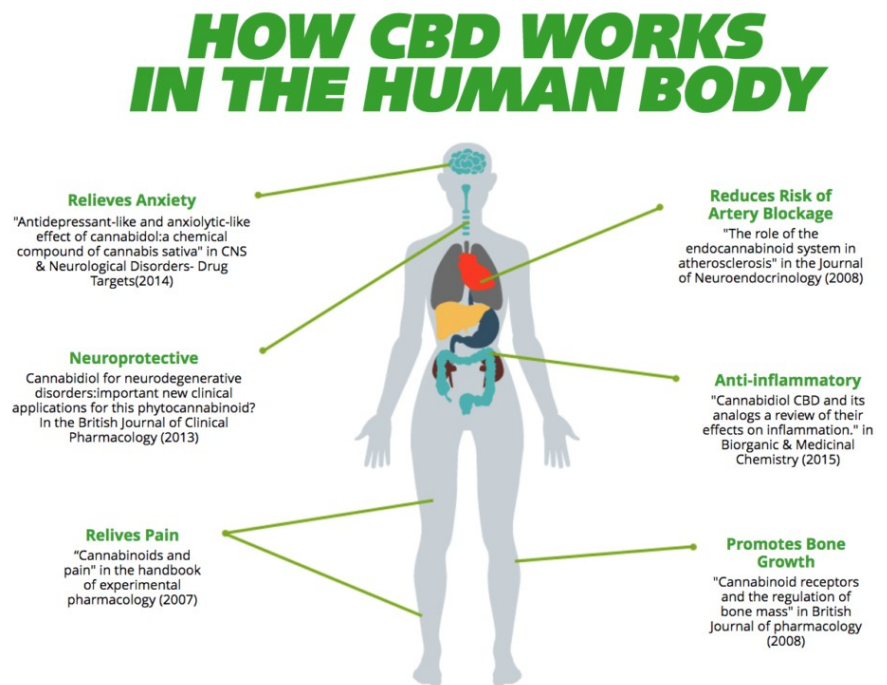

Evidence suggests that hemp and cannabis may have been farmed for up to 12,000 years and had many uses including the making of cloth, rope, paper, food, and medicine. However in the modern context, it was not until its introduction to American pharmacies by William Brooke O'Shaughnessy in 1839 that Cannabis extracts came into mainstream awareness as a medicine. A wide range of cannabis extracts became easily available and could be gotten from travelling doctors and salesmen, doctors, and drugstores throughout America.

## Uses of CBD

In the early decades of the 21st century, CBD is again becoming well-known for its qualities as a remedy for health problems. Its world-wide popularity is ahead of the slow process of making it legal to produce, supply, buy, and use cannabis for enjoyment in non-medical settings, and especially when it comes to CBD, which doesn't have a psycho-active component.

There is some experience that CBD has a positive effect in managing and treating chronic pain, PTSD, anxiety, anxiety disorder, depression, diabetes type 1, diabetes type 2, seizures, and also combined with allopathic approaches to diseases including chemotherapy and radiation therapy for treating cancer. No toxic dose for CBD is known, and there is no record from any source of a death or serious injury from CBD as of this writing.

CBD may be useful either as treatment for a specific illness or in a smaller dose for maintenance of good health. Usually, CBD is taken by mouth as oil drops or a powder that dissolves in water, or made into a food to be eaten. Another form of CBD is used on the skin as the oil or a cream to rub in. CBD is popularly taken in the "vape" method (from the word "vapor"), with the CBD is heated so it can be inhaled. This method is favoured because the effect is felt sooner than by other means. Patients who need long-lasting relief from pain or other symptoms such as nausea, may combine two methods: for example, first vape and then eat a food made with CBD.

The Decentralized nature of cryptocurrencies and blockchain technologies will facilitate the success and longevity of CBD Health Network.

## **What is CBD Health Network's mission?**

*To provide CBD consumers a system to gain access to CBD products at affordable prices. At the same time using the power of the emerging billion dollar CBD industry to generate charitable opportunities that allow people no matter financial situation to get left untreated.*

To explain CBD Health Network a little better and to sort of unfold the information in a more digestible way. We decided on presenting the information exactly how the concept was laid out between the founders of CHN. This was a real conversation that took place over two dinners spread out between 3 months

### **Dinner 1**

*CHN Idea Founder...* Wish I could purchase my CBD flower and oils on Amazon. So tired of searching through dozens of websites and walking into dozens of CBD stores only to find myself confused on quality of products and the wild swing on prices. Very easy to purchase my vitamins and health supplements on Amazon. Only if my CBD products could also be as easy. Amazon is great for making a quick purchase due to the information being so easy to digest.

*CHN Founder 2...* I agree. I am not a fan of CBD oils. CBD dried flower is the way to go. Hits the bloodstream faster but good luck buying it local. It is insanely expensive and not affordable as a long term health supplement. I can find some good prices by long searches of a dozen or so websites based out of Oregon. I love CBD flower but hate the long drawn out purchasing process.

### **3 months later**

### **Dinner 2**

*CHN Founder 1 & 2...* laid out the heart and soul of the CHN platform

*CHN Founder 3* blockchain specialist and developer also known as "The Skeptic"

*Skeptic...* Lets be honest greed, profit and capital gains make the world turn. What is CHN's use case and utility?

*CHN Response ...* From an interactive touch and feel standpoint. The CBD Health Network Portal will be our vehicle of MANY use cases and utilities. An interactive platform to Facilitate many use cases and utilities inside the CBD solution circle. Powerful tools will be included in the platform that are not present even in the might Amazon. Features like... local and global price analytic for CBD products in real-time for patients consideration.

*Skeptic...* OK, you have my attention! "Portal" sounds a lot more like a product.

*CHN Response ...* Figured once you locked into a tangible application of ideas manifested into reality you would be onboard. The "Portal" will be a platform built for CBD providers to connect with CBD consumers. Geo location of CBD retailer/suppliers and stock availability will be ready and available to patients in real-time. For local consumers searching for a product say within 50 miles they will get side by side price data for same or similar products. Shoppers wanting to pivot the power global features

will be able to source thousands of products and pick the best rated products . Do we need to elaborate or can we assume everyone knows how Amazon works.

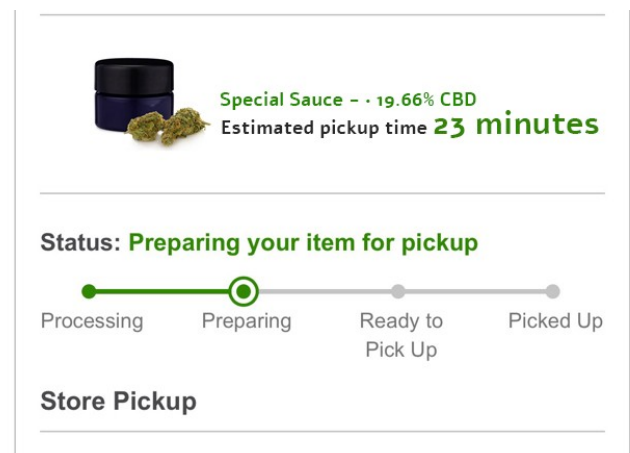

*Skeptic...* Ok , I am starting to get an idea of what this project is all about. So the “Portal” is a tool for CBD providers as well?

*CHN response...* Yes, Robust features and tools will be available to CBD providers on the “Portal”. A couple exciting features will be real time inventory of a CBD provider. One thing we wanted to include was powerful features for brick and mortar mom and pop shops. Tools like in-store pick up and local order tracking. Another feature to give local stores a fighting chance is the concept of “I’ll beat it” option. Basically if you have a store 5 miles down the road from you and your about to checkout with an online vendor . The “portal” will give the store 5 miles down the road an option to offer you a comparable product and match or beat the price. You supported your local economy , picked up your product same day and hopefully saved some money.

*Skeptic ...* Hold up, This is doesn’t sound like Amazon at all. Amazon is the brick and mortar Mom and Pop shop destroyer.

*CHN Response ...* We never said we wanted to make another Amazon. We simply want to give the user of the “portal” a familiar feel. A comfy feeling so they can get to shopping faster without having to get used to an alien environment. Our overall goals is to give back a competitive edge to local stores. Often time an in hand retail experience can be amazing. A friendly smile and someone to ask “How are you today?” Can really enhance a purchasing experience . Often times this gives the local store an opportunity to give out information that can befit the consumer. CBD market is really one that needs that face to face download of information. As consumers ourselves if we want a TV . We buy online. We have all the data to make an informative buying decision. CBD products are so new and do not appear to be standardized like say a TV. .A helpful in person consultation might help many people.

***“Fast and hassle free in store pick-up with real time tracking. The ease of online shopping with the thrill of instant gratification of same day pickup.”***

*Skeptic...* How are you going to make sure CHN businesses adopt CHN system?

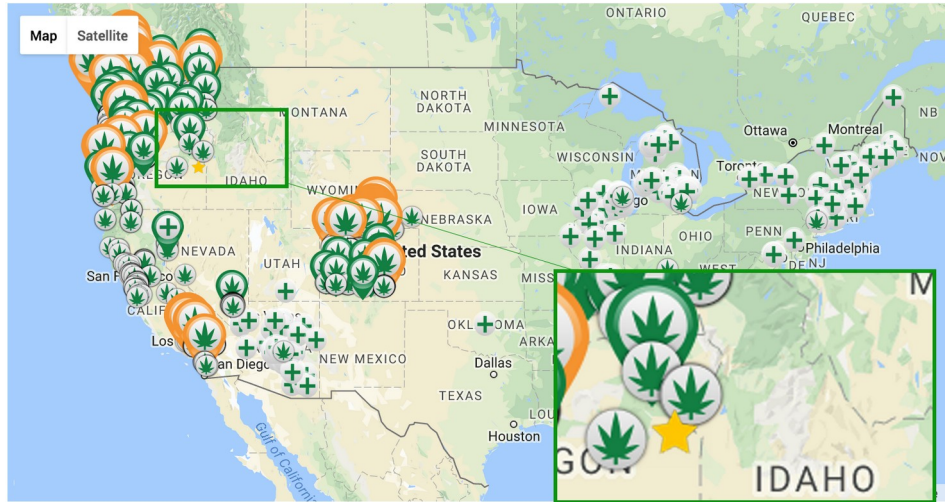

*CHN Response ...* Same reason business adopted Amazon. Its the most customer concentric platform. The world wants more data side by side to make an informative buying experience. CHN portal is going to give it to them.

*Skeptic...* what will drive demand for CHN?

CHN Response... CHN will be the fuel that powers the portal

CBD Health Network will be ever evolving and forever changing into the future of the CBD sourcing. Growing together but never losing sight of the mission.

We will have some fun along!! CBD Health Network will sponsor reputable CBD events and any opportunity for public relation outreach to further the CHN agendas for mass adoption. We will seek out partnerships with synergistic like minded projects or groups that have mutual goals.

## The Sticky but Sweet Glue that will grip the interest of the CBD ecosystem

### The CBD Health Network Strain **CRISPR- SweetBerry** 25% *CBD* – 0.1% *THC*

**CRISPR-Berry** was donated to the CHN project by group of people who remain inspired by the vision and goals of the CHN initiative. They want no credit for the development of **CRISPR-Berry**. In the spirit of giving they have donated thousands of **CRISPR-Berry seeds** to be sent to participating growers that will help fulfill CHN agenda. The genetics will ONLY be available through CHN to specific grow operations that mesh with CHN mission. Applicants may reach out but bona fide “established and licensed growers” will be selected. We already have the list of growers we want to approach but won't exclude growers that really want to be apart of the CHN efforts. The growing of this strain will help facilitate some of the more ambitious synergistic and symbiotic relationships between grow operations and CBD retailers. All working together to facilitate multiple CHN agendas and milestone. The strain will certainly generate lots of attention within the CBD industry. All in hopes to grant CHN the validity and demonstrating our seriousness for collaboration .

## **Donations and charitable giving**

The “Portal” is going to be a tool not just for CBD industry but an engine of generous giving . A percentage of the portal will allocated to the “Giving Pool” . The “Giving Pool” basically will be funding put towards one CHN wallet/department that’s soul purpose is to identify people and allocate a CHN masternodes to help fund life changing CBD products to those who need it most. All donated masternodes will be fully visable by the community with full disclosure of Recipient who will be vetted by a third party Identification service. Voting by the community on Recipients will be done through the Patient Portal.

*Skeptics...* Oh I see. This is another Donation pyramid scheme!!

*CHN response...* Negative, Nothing is free in this world. We do not expect to build a viable solution on generosity without profitability. There must be profits before we have the funding to be charitable .We will encourage Donors to sponsor a person by donating a CHN Masternode. This is the Donation that will keep giving.

*Skeptic...* So your Basically using CHN to funnel funding back to patients from the pockets of the CBD industry?

*CHN response...* Yes and No. One way we see it is. If every person taking profits from the CBD industry dropped a penny into the “CBD Care Jar” it would help people each year who simply cannot afford CBD products.

*Skeptic...* Why hassle with all this donations and charitable giving. It will eat up resources and divert energy away from profitability.

*CHN Response...* Helping people is at the core of what CBD Health Network is all about. Helping people is food for the soul. We want the good Vibes to be viral in ever nook an cranny of the CBD Health Network project. If you can’t get on board with being a decent person then we don’t need you.

## **Botany based reward structure**

CHN will be distributed to proof of stake and masternode rewards in a way to me mimic the growth of an ounce of high grade CDB hemp. Typically from seed to flower it takes a high CBD strain of hemp 4-6 months to produce its amazing flower. Payout of rewards would be 4-6 months for 1 CHN Masternode to produce another CHN Masternode. This low and slow method of rewards scarcity . Just like the curing of CBD flower . Low and Slow. Scarcity in development will be crucial .We can develop the portal and test its ability with a small supply. Profitability needs to remain iron clad from launch till Ragnarok . Lose of profitability typically is the end of most new projects. People wont like our scarcity methods cause no one is getting rich quick. Seems people in crypto are all about get rich quick schemes. If it appears to good to be true often times it is. We are gonna tell you from the start. You wont get rich. This will be hard. Anything easy is typically cheap. We want the struggle in the highest volume. We want to earn it. We don't want to be overnight successes . We want to be lifetime successes. Build something that lasts. CHN will grow low and slow. If you don’t see long. This project is not for you

Community driven 100% fair launch. CHN will truly belong to the people. The fair release and specs of the reward structure will help keep scarcity high so not one person or groups of people can

monopolize the supply. We won't be Airdropping or doing give-a-ways. No silly gimmicks to get people interested in CHN. If you understand our long term goals and want to follow the project. Great, but we won't pay for people to like or support CHN. We won't be a bunch of Chatty Cathy's along the way holding your hand or answering a bunch of silly questions on a daily basis. We will be working on CHN

## **Deity-Protocol**

To ensure generation to come can use CHN the **Deity-Protocol** was born. A function built into the decentralized portal. Whom ever holds the most CHN every 5 years can lock them into the portal. This action will give creative and custodial control over the CHN portal. This function won't be enabled till the portal is complete and able to be tested for many years. The handshake between CHN blockchain and the CHN portal will grant the **Deity-Protocol**. This concept is radical but crucial. Developers need to start thinking beyond their own lifespans. If you really want something to last it must be able to evolve without you. The portal will need no human interface to remain functional even with **Deity-Protocol** unclaimed. Humanity is fragile but CHN does not have to be. Creative control given to whom holds sway over the majority of CHN "ACTIVE" supply. The **Deity-Protocol** does not give complete control over functions of the CHN portal. The core functions can never be turned off or modified. Addition of new function will be possible as long as they do not conflict with core functions. Management of CHN reward structure collected through the portal will be available to owner of **Deity-Protocol**. Time changes everything. CHN needs to be able to change with the ages. **Deity-Protocol** will ensure when the founders wake from cryo in 1000 years the CHN portal still look familiar. Many variables will go into play with the handshake of **Deity-Protocol**. Example: withdraw and transfers must be active for 6 months prior to the handshake. This will exclude abandoned CHN supply addresses. Examples : 100 years from now Steve has 23,000,000 CHN but lost control of his keys. Unable to make a blockchain transaction using the 23,000,000 CHN. The **Deity-Protocol** will not allow handshake from Steve. Every possible future situation will be addressed before the **Deity-Protocol** is live. Survival of the portal being paramount. Vast amount of future thinking is going into development of CHN portal. CHN will start off with CBD industry because it will absorb huge market gap. Like Amazon with books. The Portal will evolve way beyond CBD as Amazon surpassed it's first market "books". Branding and future use cases require a **Deity-Protocol** to allow it to evolve with time. To also adapt to the markets of whatever time it resides in.

**Compliance.**

We want to make sure we follow all the laws and regulation of the world. Development of CHN will adhere to the laws and regulations of the lands it resides in.

We make no outlandish claims that you will get rich by supporting CHN. We are not asking for money or funding. We have jobs that support our lifestyle. We don't need funding!!! NO , we wont sell you CHN. The launch will be fair and widely announced. We wont be showing a massive team with special titles . We wont be bringing in so called influencers to say "hey buy this". We don't want your money. We don't want the hype or the FOMO. Think of CHN as a figment of your imagination . It lives in the aether tell it is touch and tangible. CHN is the quite girl at the party you end up married to years later. Your going home with the loud shiny blonde tonight .Waste your money on the loud shiny ones tell tell your wedding bells.We don't want professional traders building up the market then dumping. We want like minded people to love the project first. We want people to love the portal. We want CHN to help people. This road will be hard. This project is not going to be profitable "nothing to see here movealong". We want to make sure that eventually after we have earned it... After we have helped people . Only then will CHN give the fruits of our labor and loyalty ... Welcome to CBD Health Network

To be charitable we must be profitable. This project needs the loyal and true visionaries . Lets keep this project a clean one. Void of the greedy and plentiful in philanthropist

*"For every human illness, somewhere in the world there exists a plant which is the cure"*

As she floats down, she notices that the sides of the well are covered with cupboards and shelves. She plucks a marmalade jar from one of the shelves.

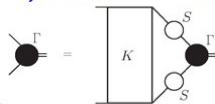

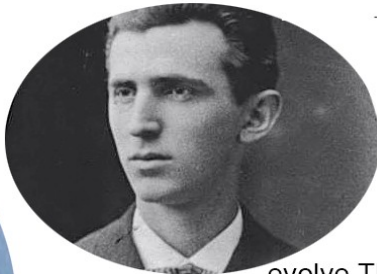

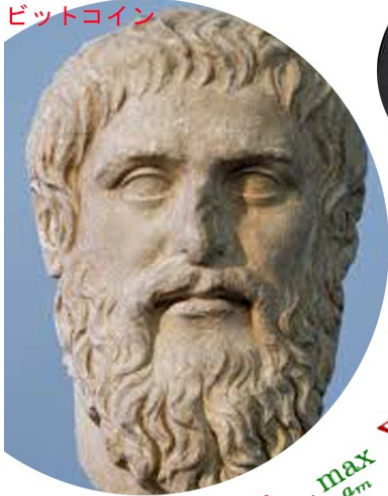

Dan has 5 pens and 3 pencils, (X) minus 0.1, (Y) minus 0.2, (Z) minus 0.7  
 Jessica has 4 more pens and 2 less pencilst han him.  
 How many pens and pencils does Jessica have in total?
